

Nero Volume Licenses 2026:

Professional media production and secure data archiving for businesses

Easy to use
for users & admins

Compatible with:
Windows 11/10/8.1/8/7

NEW!

Typical Use Cases

Secure archiving and data distribution

Create and copy CD, DVD, Blu-ray Discs™ or USB flash drives for long-term archiving and secure distribution of sensitive business data using SecurDisc™ technology.

Training and presentation content

Record screen activity and create tutorials, training materials, and software demonstrations for internal or external use.

Video production for corporate communication

Create and edit high-quality video content for marketing, training, internal communication, and product presentations.

Media conversion and distribution

Convert video and audio files into widely used formats for different devices, platforms, and business use cases.

Efficient media management

Automatically organize photos, videos, and music, and detect duplicate files to optimize storage usage and workflows.

AI-powered image enhancement

Improve image quality automatically using AI-based enhancement and integrated editing tools.

Privacy-compliant video usage

Automatically blur faces, license plates, or other sensitive content to ensure GDPR-compliant video usage.

Easy Administration

- Centralized license management via master license key
- 23 language versions for international organizations
- Individual assignment of burning rights with Nero BurnRights
- Free updates to ensure maximum system security and stability
- 100% offline-capable solution – ideal for secure corporate networks and isolated IT environments
- Optional software maintenance and upgrade options

AI-Powered Features

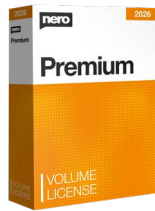

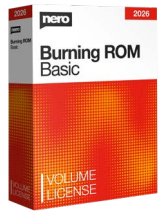

- AI Image Upscaler for automatic image enhancement and resolution scaling
- Motion Tracker for automatic detection and blurring of sensitive content in videos
- AI-based media organization for automatic categorization of photos, videos and music

Software Maintenance

- ✓ Annual term with transparent pricing and no automatic renewal
- ✓ Professional technical support
- ✓ Includes one free version upgrade within the contract period
- ✓ Ensures long-term system compatibility and security

Professional burning and secure archiving

Nero Basic Burning ROM VL is a reliable solution for professional disc burning, secure archiving and controlled data distribution in business environments.

With SecurDisc™ 4.0, data integrity verification, and automation capabilities, it is ideal for IT departments, public institutions, and organizations with high security requirements.

- Burn and copy files and folders to CD, DVD, and Blu-ray Disc™ with finalization for maximum compatibility
- SecurDisc™ 4.0 with 256-bit encryption for maximum data security
- Digital signature and checksum verification to ensure data integrity and authenticity
- Encrypt and securely transfer data on USB flash drives and SD cards using SecurDisc™ 4.0
- USBxCOPY: fast and reliable duplication of USB flash drives with final verification
- Create and burn ISO images for standardized deployment and archiving processes
- Bit-accurate 1:1 disc copies including certificate
- Command line support (Nero CMD) for integration into automated IT workflows and scripts
- Detailed logging via Windows Event Viewer for auditing, monitoring and error analysis
- Design and print CD, DVD, and Blu-ray Disc™ covers with Nero CoverDesigner
- Recover lost or damaged data from hard drives, CDs, DVDs, and flash storage devices
- Convert audio files into multiple supported audio formats

Advanced video and media editing for business use

Nero Premium VL extends professional burning capabilities with powerful video editing and media processing tools.

Ideal for organizations that need to efficiently create, edit, and distribute multimedia content.

Includes all features of Nero Basic Burning ROM 2026 VL, plus:

- Video editing with Express mode and advanced multi-track editing for both simple and complex video projects
- Import of video, audio, and image files from multiple sources for further processing
- Export and conversion into widely used video formats for various devices and business use cases
- Authoring of DVD-Video™ and Blu-ray Disc™ projects with customizable menus
- Export video projects as DVD-Video™ or Blu-ray Disc™ for professional distribution
- Playback of DVDs and a wide range of video and audio formats
- Broad format support for importing, editing, and exporting media content
- AI-based video upscaling to improve the quality of older or lower-resolution video material

The complete multimedia solution for professional environments

Nero Platinum VL offers advanced features for media production, video editing, and media organization.

With AI-powered tools, professional templates, and extended production capabilities, it is ideal for marketing, training, and corporate communication.

Includes all features of Nero Premium 2026 VL and Nero Basic Burning ROM 2026 VL, plus:

- Motion Tracker for automatic detection and blurring of faces, license plates, and other sensitive content
- Screen recording for training materials, presentations, and software demonstrations (including high frame rates and zoom features)
- AI Image Upscaler for intelligent image enhancement and upscaling
- Support for video projects up to 8K resolution for high-quality productions
- High-quality templates for films, discs, and vertical video formats, including royalty-free music
- Corporate identity templates for consistent branding in business videos
- Direct image editing from the video timeline without leaving the video project (Nero PhotoSnap)
- Nero DuplicateManager for automatic detection and removal of duplicate media files
- AI-based organization and categorization of photo libraries
- Rip and convert non-commercial DVD-Video™ and Blu-ray Discs™ into digital formats for archiving and playback

Optional: Also available as an online version with extended cloud and AI features.
